

# Industrial

EU Stage V/U.S. EPA Tier 4 Final  
55-100 kW / 74-134 hp

Perkins®  
**SYNCRO**

3.6 litre

The Perkins® Syncro engines offer a compact power solution for off-highway applications in construction, agriculture and industrial.

For our customers these compact, 4 cylinder engines provide excellent performance in power, peak and low speed torque, fuel consumption and transient response.

Reliability and easy service access are integral to the design of the engines. It is available with a range of installation options to enable OEMs to minimise the size of the engine bay of their machines

## Emissions

EU Stage V

U.S. EPA Tier 4 Final

Japan MLIT Step 4

Specification	904J-E36TA	
Number of cylinders	4 vertical in-line	
Bore and stroke	98 x 120 mm	3.9 x 4.7 in
Displacement	3.6 litres	220.9 in <sup>3</sup>
Aspiration	Turbocharged aftercooled	
Cycle	4 stroke	
Combustion system	Direct injection	
Compression ratio	17:1	
Rotation	Anti-clockwise, viewed on flywheel	
Cooling system	Liquid	
Total coolant capacity	6.5 litres	6.86 qts

## Features and benefits

### Dependable power

- The engine has been designed using the latest predictive engineering methods, combined with an extensive field validation program to ensure reliable power in the toughest off-highway conditions
- Quality, reliability and consistency are assured. Our facilities worldwide employ the same efficient processes, the same tested and validated components, and the same stringent quality controls wherever your engines are manufactured.

### Lifetime of low cost

- Fuel consumption is optimised to match the operating cycles of a wide range of off-highway applications.
- Hydraulic tappets, multi-vee belts and 500 hour service intervals enable low cost maintenance
- **Warranties and Perkins Platinum Protection**  
We provide one-year warranties for constant speed engines and two-year warranties for variable speed models, as standard. These are supported by Perkins Platinum Protection that can be bought additionally  
Discover more: [www.perkins.com](http://www.perkins.com) 'Parts and Service'

### Industry leading flexibility

- A modular engine concept allows OEMs to design one engine installation for different regions. This reduces cost and development time for cooling pack, mounting, hydraulic and control interfaces

### Local support, global coverage

- Perkins recognise that the customer relationship is important to machine manufacturers and we can offer a range of flexible solutions to help provide appropriate support, either to the OEM's network or directly to the machine customer
- Perkins information systems enable our distributors to quickly diagnose engine faults and identify the right parts. The Perkins logistics operation is able to dispatch more than 45,000 different parts from stock, reaching the customer within 24 hours
- To find your local distributor: [www.perkins.com](http://www.perkins.com) 'Our Network'

## Technical information

### Controls and electrics

- 12 or 24V systems
- Data interface via CANbus J1939
- Full electronic control
- High power alternator and starter motor options
- Glow plugs for best cold starting with minimum battery impact
- Sensors and robust wiring harness included

### Flywheels and flywheel housing

- SAE3 or SAE4 flywheel housing
- Wide choice of interfaces for common transmissions and hydraulic pumps

### Fuel system

- Electronic high pressure common rail
- Fuel filter - chassis mounted
- Water sensor included - early warning for operator

### Lubrication system

- Oil filters. Mounting options available on either side of the engine, plus remote
- Dipsticks. Choice of position and length
- Oil fillers. Multiple locations on engine to allow for choice of service access
- High incline sump. 35° continuous in all directions. Suitable for machines that are used on steep slopes

### Power take-off

- SAE-A and SAE-B interfaces available

### Standard emissions control

- Diesel Oxidation Catalyst (DOC), Diesel Particulate Filter (DPF)
- For engine power ratings above 56 kW, Selective Catalytic Reduction (SCR) will also be added
- Aftertreatment mounted on engine as standard, remote available

### General

- Cold-start capable with standard equipment to -25°C
- Supplied painted or lacquered

2200	100	134	1500	550	406	D

## Rating definitions and conditions

**IND-C (Intermittent)** Is the horsepower and speed capability of the engine where maximum power and/or speed are cyclic (time at full load not to exceed 50%).

**IND-D** For service where maximum power is required for periodic overloads (time at full load not to exceed 10% of the duty cycle).

### Rating Conditions for Diesel Engines – up to 7.1 litres

All rating conditions are based on ISO/TR14396, inlet air standard conditions with a total barometric pressure of 100 kPa (29.5 in. Hg), with a vapour pressure of 1 kPa (0.295 in. Hg) and 25°C (77°F). Performance is measured using fuel to specification EPA 40 CFR Part 1065 and EU Directive 97/68/EC with a density of 0.845-0.850 kg/L @ 15°C (59°F) and fuel inlet temperature 40°C (104°F).
